

## Fungicide

### Instrata Elite

Instrata Elite from Syngenta is a broad spectrum foliar fungicide with both contact and systemic properties for control of Microdochium Patch (Fusarium), Dollar Spot (Sclerotinia homoeocarpa), Brown Patch (Rhizoctonia solani) and moderate control of Anthracnose (Colletotrichum graminicola) on managed amenity turf.

The fast two-way action of Instrata Elite can be used all year round. The unique properties of Instrata Elite perfectly match the demands for disease control from mid to late autumn and through early spring.

Instrata Elite combines the new active ingredient, difenoconazole, with the outstanding performance of fludioxonil. Together, the complementary actives target different stages of disease life cycles for flexible application timing and reliable results.

**Active Ingredient:**

80.3g/l Difenoconazole  
80.3g/l Fludioxonil

**Application rates:**

3lt/ha in 125-500ltrs of water  
Pack size: 3ltrs

### Medallion

Medallion TL utilises innovative Contact+ activity developed to provide exception long lasting protection from Fusarium and other turf diseases.

Medallion TL is a very fast acting fungicide that works by directly targeting disease pathogens on the leaf, in the thatch and at the soil surface.

Optimum use is generally during periods of slow growth from late Autumn to early Spring,

**Active Ingredient:**

125g/l Fludioxonil

**Application Rates:**

3ltrs/ha in 125-500ltrs of water  
Pack size: 3ltrs

### Dedicate

Dedicate is a contact and systemic turf fungicide which both cures and prevents Fusarium Patch, Red Thread, Dollar Spot, Anthracnose and Rust in managed amenity turf, at any time of year.

Dedicate may be applied to turf areas which include golf courses, institutional, commercial and residential lawns, sports fields, parks, bowls and cricket pitches, municipal grounds and cemeteries.

Dedicate should be used preventatively or at first signs of disease. Dedicate can be used when grass is either dormant or activity growing and displays both protective and some curative activity.

Dedicate has been proven to be rainfast within 1 hour of application.

**Active Ingredient:**

200g/l Tebuconazole  
100g/l Trifloxystrobin

**Application Rates:**

1ltr/ha in 400-500ltrs of water  
Pack size: 250g

**Heritage**

A unique fungicide with proven and unparalleled preventative and early curative action. Enters turfgrass through leaf, stem and root system.

Heritage effectively protects turf as it grows, combating disease infection from within. This true systemic movement works in all conditions and does not rely on rain or air distribution to reach new parts.

**Active Ingredient:**

500g/kg Azoxystrobin

**Application Rates:**

500g/ha in 800-1,000ltrs of water  
Pack size: 500g
