

Top Dressings - Whitemoss Eco

Whitemoss Eco is a leading supplier of very high quality, specification-focused, sustainable materials used in the construction and maintenance of all natural sports turf surfaces.

They produce a comprehensive range of specific Top Dressings, Root Zones and Tees / Divot Mixes containing **Green Compost** across the entire range to replace non-sustainable organic amendments.

Green Compost Features:

- Great consistency
- Sustainability
- Provides the ability to blend at any time of year
- Provides improved performance over “regular soils”

Green Compost Benefits

- Nutrient supply source
- Reduced loss of nutrient (*eg, through leaching*)
- Improved Cation Exchange Capacity
- Helps increase root mass
- Improves water/oxygen holding capacity of soil
- Increases microbial activity
- Aids suppression of soil borne diseases
- Helps to reduce thatch build-up
- Cost benefits (*eg, 35% lighter than traditional soil*)
- Helps the environment (*stops the need to strip peat and soil from existing ‘green’ areas*)
